WHO AM I?

I am a senior software engineer with primary experience in building learning management systems, as well as data portability and knowledge management solutions. Being a self-taught specialist, I am trying to build expertise in a large variety of fields spanning from software engineering and design to general informatics and learning methodologies. My passion is learning and sharing knowledge with others through collaboration, dedication and practice.

EXPERIENCE

9/2020 – 2/2022	Senior Software Development Consultant Development, maintenance and support of customer platforms and services. Node.js / ExpressJS / TypeScript / Microservices	Reaktor
1/2020 – 8/2021	Senior Developer Development and maintenance of <u>Lens IDE</u> as well as other proprietary cloud services. Node.js / NestJS / TypeScript / Electron / Kubernetes	Mirantis Inc.
7/2019 – 1/2020	Senior Web Developer Developing logistics automation and waste management solutions. Node.js / React / TypeScript / Flow	RELEX Oy
3/2019 – 7/2019	Senior Web Developer Building automation solutions for targeted ad campaigns. Node.js / React / Flow	Smartly.io

2011 – 2013 part time	Web Developer Developing an electronic registry and a web-announcement platform for university's library. JavaScript / PHP	Fryazino branch of the Institute of Radio-Engineering and Electronics

LANGUAGES

Russian - native
English - proficient

HOBBIES

I've been doing game design and development as a hobby since middle school. Through this hobby I've managed to get familiar with a lot of engineering methodologies and programming languages. I'm also a fan of athletic sports and a Wing Chun practitioner.

NON PROFIT

I was a focal point and co-organizer at EuroDIG workshop "Recent studies on accessing educational content". Right now I'm an acting board member at the Organization for Ethical Source.
