## WHO AM I?

I am a senior software engineer with primary experience in building learning management systems, as well as data portability and knowledge management solutions. Being a self-taught specialist, I am trying to build expertise in a large variety of fields spanning from software engineering and design to general informatics and learning methodologies. My passion is learning and sharing knowledge with others through collaboration, dedication and practice.

## EXPERIENCE

7/2019 – present	<b>Senior Web Developer</b> Developing logistics automation and waste management solutions. Node.js / React / TypeScript / Flow	RELEX Oy

2011 – 2013 part time	<b>Web Developer</b> Developing an electronic registry and a web-announcement platform for university's library. JavaScript / PHP	Fryazino branch of the Institute of Radio-Engineering and Electronics

## LANGUAGES

**Russian** - native  
**English** - proficient

## HOBBIES

I've been doing game design and development as a hobby since middle school. Through this hobby I've managed to get familiar with a lot of engineering methodologies and programming languages. I'm also a fan of athletic sports and a Wing Chun practitioner.

## NON PROFIT

Before moving to Finland I used to volunteer at community events and film festivals, working as a guide and an interpreter for English-speaking participants. Right now I'm developing informal learning methodologies and services for an educational non-profit.
